CapstoneUML_sprint1

Change List:
- added office location instead of job location to employee
- added seniority date field to employee
- renamed row version field
- removed table name prefix from field names
- removed isActive from department
- you can find POs for a given employee in a given time frame with the SearchPurchaseOrders(filters) function in the POService. The filters parameter is a DTO which has properties for startDate, endDate, and PoNumber. This criteria is searched against the creationDate and PoNumber fields in the PO table.

Service

EmployeeService
- +EmployeeRepo : EmployeeRepository
- +GetEmployeeById(id : int) : Employee
- +GetEmployeeList() : List<Employee>
- +AddEmployee(employee : Employee) : Employee
- +SearchEmployee(department : string, id : int, name : string) : List<EmployeeDisplayDTO>
- +ValidateEmployee(employee : Employee) : bool

PurchaseOrderService
- -PurchaseOrderRepo : PurchaseOrderRepository
- +AddPurchaseOrder(purchaseOrder : PurchaseOrder) : PurchaseOrder
- +GetPurchaseOrdersForEmployee(employeeNumber : int) : List<PurchaseOrder>
- +GetPuchaseOrdersForDepartment(departmentId : int) : List<POSearchResultsApiDTO>
- +UpdatePurchaseOrder(id : int, purchaseOrder : PurchaseOrder)
- +SearchPurchaseOrders(filters : POSearchFiltersDTO) : List<PODisplayDTO>
- +ValidatePurchaseOrder(po : PurchaseOrder) : bool

ItemService
- -ItemRepo : ItemRepository
- +AddItem(item : Item) : Item
- +ItemExists(itemSearch : ItemSearchDTO) : Item?
- +ValidateItem(item : Item) : bool

DepartmentService
- -DepartmentRepo : DepartmentRepository
- +GetActiveDepartments() : List<DepartmentDisplayDTO>
- +AddDepartment(department Department) : Department
- +ValidateDepartment(department : Department) : bool

AuthService
- -AuthRepo : AuthRepository
- +Login(username : string, password : string) : UserDTO

TokenService
- -configuration : IConfiugration
- +CreateToken(user : UserDTO) : string

depends on
